

TORKED

Connect your free AI key · 2-minute setup

Torked's world is run **live by an AI Game Master**, so every playthrough is different. To play, you give it one free **API key** from an AI provider. We recommend **Cerebras** — it's free, very generous (about a million words a day), and the fastest. It takes about two minutes.

1 Get your free Cerebras key

- 1 Go to **cloud.cerebras.ai** and sign in (Google, GitHub or email — all free, no card).
- 2 In the left menu, open **API Keys**, then click **Create API Key** and give it any name.
- 3 Click **Copy**. Your key starts with **csk-**. (You only see it once, so copy it now.)

2 Paste it into Torked

- 1 Open the game and, on the home screen, paste the key into the box **"Paste your Cerebras key here"**.
- 2 Click **Begin your quest**. That's it — your realm loads.
- 3 Your key is remembered in this browser, so next time you can jump straight in.

■ **Your key is private.** It is stored only in your own browser and sent only to the AI provider you chose. The game and its author never see it.

Prefer a different engine? All free.

Engine	Free allowance	Get your key at	Key looks like
Cerebras (recommended)	~1,000,000 words/day, fastest	cloud.cerebras.ai	csk-...
Google Gemini	~1,500 plays/day, big memory	aistudio.google.com/apikey	Alza...
Groq	Very fast, smaller daily limit	console.groq.com/keys	gsk_...
Ollama (on your PC)	Unlimited, private, no limits	ollama.com (run python3 server.py)	no key

If something goes wrong

"Model ... does not exist"	Hard-refresh the page (Cmd/Ctrl + Shift + R) to load the latest version, then try again.
"401 / wrong API key"	Re-copy the key and paste it again — make sure there are no extra spaces.
"Waiting / rate limit"	Give it a few seconds, or switch engine under "Use a different engine" on the home screen.
Lost your key?	Just create a new one at your provider — it's free — and paste it in again.
